## 2018 Year-of-the Bird Citizen Science Workshop in Japan

Date: 28 October 2018

Time: 14:00 – 17:30

Venue: Lecture Hall Number 8, 2<sup>nd</sup> floor, Building 1, Faculty of Agriculture, Yayoi Section, Hyogo Campus, University of Tokyo (please refer to the access map attached)

## ORGNIZERS

Birdlife International Tokyo (Simba Chan) National Geographic Society - Asia (Jay Lee)

## PROGRAMS

The main event is a seminar on the status of land migratory birds ('summer birds') and introductory talks to high school to university students (aim at around 100 participants), followed by a hands-on-workshop or birdwatching / trial of bird census method trip will be held after the seminar (around 30 of those who have expressed interest after the seminar, can have more than one trip if the response is good.

- The need of monitoring on migratory passerines (will focus on the Yellow-breasted Bunting) Speaker: Seiji Hayama, Wild Bird Society of Japan
- The need of small bird monitoring and contribution to citizen science

Speaker: Mutsuyuki Ueta, Japan Bird Research Association

- Banding of migratory birds in Japan with case studies on buntings: how banding helps us to understand more on birds

Speaker: Gen Morimoto, Yamashina Institute for Ornithology

- Report on National Geographic projects
  - > Biologging study for seabird ecology and ocean environment

Speaker: Katsufumi Sato, University of Tokyo

> Study and conservation of Chinese Crested Terns in Indonesia

Speaker: Simba Chan, BirdLife International Tokyo

Access map:

Please take the Tokyo Metro Namboku Line and get off at Todaimae Station (N 12). The Faculty of Agriculture is only a few steps away when you turn left from Exit 1 of the station (the small upper left square on the map)

Walk through the gate then you will find Building One ahead of you on the right. Lecture Hall Number Eight (the venue) is on the second floor.

Enquires:

Simba Chan (simba.chan@birdlife.org) Kazuaki Kato (kaz2m2006@yahoo.co.jp)
